KEY
TAKEAWAYS

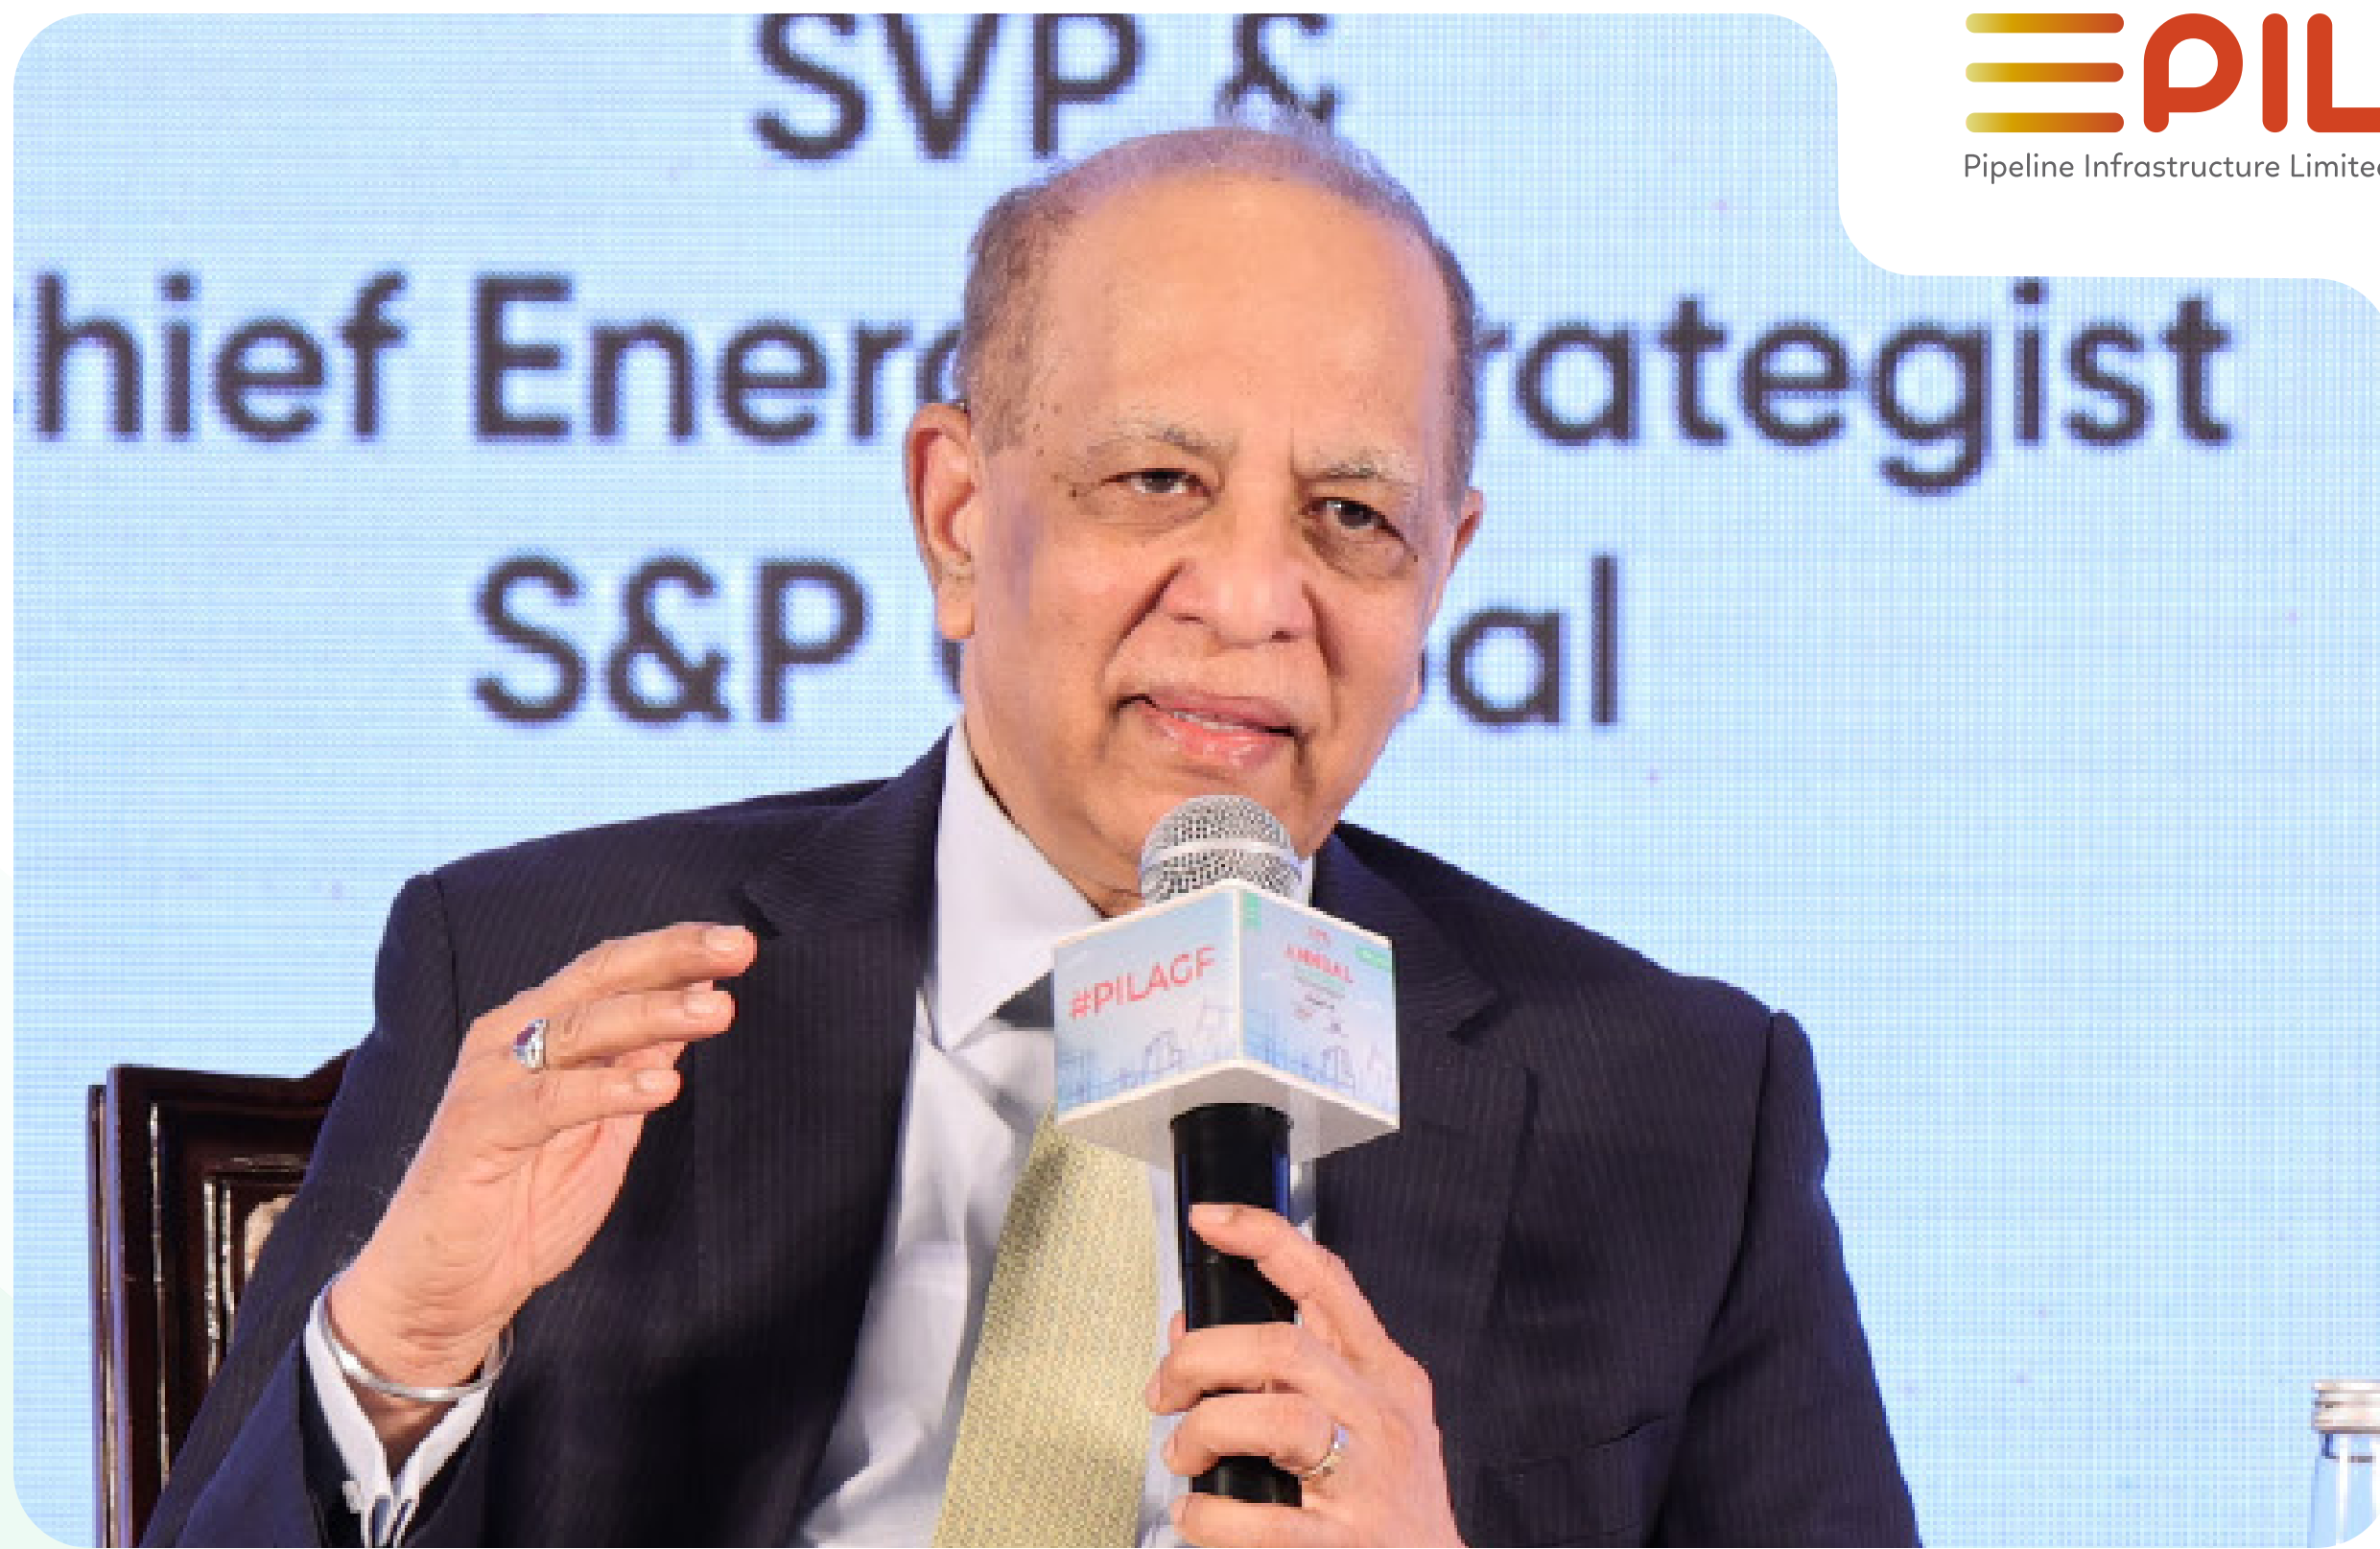

Gas is not a bridge fuel.
It is coring economic
infrastructure.

Air quality, affordability, and energy security must converge. Gas substitution delivers all three, now.

Price signals matter more than mandates. Fiscal neutrality and flexible markets unlock real demand.

4

Idle gas power plants are strategic assets. Reliability, flexibility, and renewable integration depend on them.

5

Industrial fuel switching is the fastest win. MSMEs can unlock up to 100 MMSCMD of demand with the right incentives.
